

Touch Board Plus

An Interactive
Multi-Touch
Experience for All

Make lessons come to life with the simple touch of a finger. Touch Board Plus is a pen-and-finger interactive whiteboard that provides multiple ways to solve problems, write sentences and draw pictures for a more engaged learning experience. High-resolution technology offers clear and concise accuracy in writing, diagramming, annotation and lesson delivery.

- Pen-and-finger touch solution works with Windows®, Mac and Linux®
- Up to 6 multi-touch points for interactive collaborative learning
- Steel surface supports magnets when used with dry markers or in non-interactive mode
- Touch Board can be mobile or stationary with AdjustIt 3 stand

ADVANCED TOOLS FOR EFFECTIVE INSTRUCTION

Award-winning Workspace software powers the Touch Board Plus, enabling students and instructors the opportunity to write, diagram, manipulate and annotate over content. Incorporate response systems for quick assessments. Display questions on Touch Board Plus and students can interact and respond with clickers or mobile devices, allowing for immediate review and discussion of results.

SUPPORT MOBILE INSTRUCTION

Enhance the functionality of Touch Board Plus with a Mobi View™ device. Mobi View provides educators the freedom to move around the room for greater interaction and engagement. Control and annotate content through a mobile touch screen. Combine with Mobi™ Learners to increase participation and allow up to nine students to display work at the same time, from anywhere in the room.

EXPAND EDUCATIONAL BOUNDARIES

The AdjustIt 3 stand is easy to install and provides Touch Board Plus with exceptional mobility from class to class and around the room. Superior flexibility enables presenters to adjust the board to any height. AdjustIt 3 includes a video projector adapter and is available in wall-mount or floor-stand configuration.
