NUREVA™ MOBILE SPAN™ SYSTEM

Great ideas can happen anywhere, anytime. Now creative collaboration can, too. With the mobile Span system, your teams have the flexibility to meet, collaborate and brainstorm where they want, whenever they want. The integrated system is easy to use, quick to set up and transforms almost any wall into a 6' 2" (1.88 m) interactive digital workspace. You can get even more space for group collaboration by linking several mobile systems to produce a display up to 24' 8" (7.52 m) wide, ensuring every participant has more room to interact with content and create, share and build on ideas.

The system provides easy access to all the interactive power of Span software. The cloud-based software transforms familiar tools like sticky notes, sketches, text boxes and flip charts into digital tools that enhance the creative process through

- Visual collaboration
- Real-time multiuser interactivity
- Dynamic brainstorming

FLEXIBILITY TO FUEL CREATIVITY
The mobile Span system takes collaborative work beyond the confines of formal conference or meeting rooms. Ad-hoc collaboration can now happen anywhere. Participants work together on an expansive digital canvas, writing notes, making sketches and adding images to design solutions. They can use the two active pens to interact with content directly on the wall or participate with their laptops, smartphones or tablets. And with QuickShare, they can contribute ideas from devices without the need for a Span subscription. Team members also don't have to be in the same room to collaborate effectively. They can be located anywhere and still take part in discussions, add ideas and share their screens in real time, so collaboration has no barriers.

IDEAS CAN FLOW IN AN INSTANT
Being able to move the Span system anywhere means your teams will always have access to the collaboration technology they need anytime inspiration strikes. Those ad-hoc meetings or on-the-fly brainstorming sessions can be in full swing in no time. Simply wheel the mobile cart into any room, plug it in and turn it on – there's no extra set up or calibration required. In seconds, the room becomes a technology-rich collaboration space or the ideal spot for a quick stand-up meeting. Team members can instantly start collaborating and creating using Span software and its full suite of powerful interactive tools.

AN INTEGRATED SYSTEM POWERS COLLABORATION

The powerful system delivers a highly visual and immersive group collaboration experience. The solid-state illumination (SSI) interactive projector is full-HD and has a 1080p resolution for sharp, vibrant images. Projectors can be linked together to provide a panoramic view, and they offer 25,000 hours of carefree operation.

The sleek mobile cart has durable all-swivel casters, making it easy to move the system where you need it. Simply wheel it into any room and quickly start using all the digital tools and features of Span software, our powerful cloud-based collaboration software that is available through flexible subscription options.

EFFICIENCY MEETS INNOVATION

For companies exploring new ways to foster creativity and support different working styles, the mobile Span system is a simple, flexible and cost-efficient choice. Since teams can work, meet and collaborate in any office space, it's easy to take advantage of underused meeting rooms. Or if your open-concept space is short on meeting rooms, the system can be quickly set up in any common area. The system is also easy for different teams to share, helping organizations get the most from their technology investments.

SYSTEM BENEFITS

Flexibility – Take the sleek mobile cart anywhere to transform virtually any wall into a creative collaboration space

Expansive workspace – View all ideas and information on one interactive surface, so it's easier to make connections and see greater possibilities

Remote collaboration – Capture everyone's ideas and input, whether contributors are in the same room or far apart

SYSTEM COMPONENTS

Integrated HD 1080p SSI projector
Sleek mobile cart
Two active pens
Side-mounted USB port
Single power cable
