

EVOKO MINTO

A new era in phone-conferencing

The modern way to meet

Say hello to the most important participant in your future meetings. Say goodbye to background noise, distractions and comments that can't be heard. Evoko Minto is intelligent, really easy to work with and lovely to look at. With a remarkable ability to hear what's important and what isn't. All thanks to a unique patented sound technology. Ready for use with your mobile phone, tablet or laptop: fast tracking you to the core of the meeting. Getting the message through to everyone.

Fantastic listener

Evoko Minto only picks up what's important: the voices of the participants in the meeting. No matter the distance or the direction, all are heard at the same volume. Leaving out echoes and disturbing noises. Four hi-tech microphones cover rooms for 20 people within a range of 10 m (32 feet). A patented and truly amazing sound technology.

So easy to work with

Evoko Minto leaves no ugly cords on the table. Because it is battery powered it can instantly be used in any available room. When finished, just put it on the wall mount to charge. The voice feedback in multiple languages and the backlight – that changes color – tells you what's going on. Want to talk privately? Just swipe your hand over the top. The backlight instantly turns red and the microphones are muted.

A great team player

Evoko Minto operates smoothly with your mobile phone, tablet or laptop. Working either through Bluetooth or cable, it takes only seconds to connect and can be controlled through your own device. Call via the cellular network or your preferred UC application. Perfect for e.g. Skype, Skype for business and Google Hangouts.

Lovely to be around

Evoko Minto is designed by multiple award-winning Swedish designers No Picnic. The design and its simplicity is one of the keys to great performance. So intelligent and easy to use that absolutely anyone can master it. And a joy to look at in any meeting room. Simple, wireless and smart.

- Diameter: 240 mm (9.4 in)
- Height: 50 mm (2.0 in)
- Weight: 1.1 kg (2.4 lb)

AWARDS

"Evoko Minto is making these phone meetings very effective by its simplicity and ease of use. The sound quality is superb and everyone is amazed with the fact that even the people at the far end of the room can be heard clearly. The wireless operation is totally in line with our modern way of working and the fact that you can mute it with a simple swipe of your hand is absolutely brilliant!"

WARRANTY

- 2 years from date of purchase
